FEATURES

Dating to late 19th-century France, artisans have been creating imitations of wood in garden furniture. Termed *faux bois*, or "false wood," we've recreated the graceful lines and organic flow of tree branches in hand-sculpted concrete reinforced with a steel armature. Swathed in a weathered concrete finish, these refined statement pieces lend an outdoor space the feeling of a historic European garden.

- Handcrafted of concrete on a steel frame
- Inherent variations in the color and shading of the concrete, as well as the handcrafted construction, lend unique character to each piece; no two will be exactly alike
- Concrete will age gracefully over time and acquire a weathered patina; susceptible to staining with time and use
- Concrete surface will show hairline cracks over time, exhibiting the characteristics of antique pieces; these will not compromise the strength of the furniture
- Weather-resistant powder-coated steel plates on base of legs, with levelers to adjust height
- Protect your investment with our custom-fit outdoor covers
- Weathered grey finish

CARE

Clean with a damp cloth. Avoid abrasive soaps and cleansers. Wipe up spills quickly to avoid staining. Do not cut directly into the concrete tabletops. When not in use, a custom-fit cover must be used to guard against moisture and the elements. This will protect the finish and prolong the life of your furniture.

In certain outdoor conditions, moss may appear on the surface of the concrete. Some users find this desirable and encourage moss growth for an antique appearance. If moss is not desired, the concrete furniture can be cleaned with a soft brush or cloth and a mild detergent solution.
