Some options are only available in certain sizes and shapes

lifting system

crank system

MAX E-Z Drive Crank Lift System with telescoping mast:
Precision engineered and included with all TUUCI Ocean Master Max center post and Ocean Master Max Cantilever Parasols; TUUCI's E-Z Drive Crank Lift System allows for smooth, easy operation of even the largest shade platforms with only an external hand crank. An extremely durable internal system of stainless steel gears, gear box and stainless steel worm drive work together in this self-lubricating crank system to raise and lower the canopy.

lifting system

telescoping mast

Telescoping Mast:
Designed and engineered by the TUUCI team in Miami; the telescoping feature is included on all MAX center post, MAX Cantilever and the larger Ocean Master Classic TUUCI parasols. As the canopy is closed, the telescoping feature raises the mast and ribs so as to clear any furniture below the canopy. When the canopy is opened, the telescoping feature disengages to lower the canopy to the appropriate height.

*important to check the product specifi ation for exact table clearance.

finia

acorn
aluminum

* Double wind vent & fishtail profile only available on octagon shapes
† Auto-lift piston system only available on single canopy 8' - 10' sizes
