# The World Is Not Enough

*A bastion of classic American elegance continues its global domination tour with a sprawling new flagship on the Champs-Élysées. Here's the takeaway: Never underestimate a Parisian's taste for California kings.* BY LEENA KIM

The new RH Paris, which occupies seven floors, is the brand's first European outpost with hospitality (there are two restaurants). You can still shop those iconic couches, of course.

On the first level, pieces from RH collections are arranged into inviting spaces. The walls feature works by artist Vladimir Prodanovich.

"Paris has very strong opinions," says RH CEO and chairman Gary Friedman. "This is where you come to do your very best work, where you have the most to gain or lose."

Like what you see? Shop below or, if you're at RH Paris, consult the interiors studio located next to the courtyard. There is a library of rare design books, too, for inspiration.
