

UNIVERSAL TRADITIONAL P-TRAP INSTALLATION INSTRUCTIONS

Model: RH-3014

RESTORATION HARDWARE

These instructions are a guideline for a basic installation

Recommended Installation by a Professional Plumbing Contractor

- To find proper fit and alignment, loosen the wall bend slip nut and check the fit between tailpiece and waste connection. If necessary, adjust the sink drain tailpiece length to align with waste connection height requirements.
- Disassemble wall bend tube from J-bend. Slide slip nut and appropriate washer onto tailpiece. Loosely hand-tighten J-bend to slip nut & tailpiece for later adjustment.
- Insert wall bend tube at least 1/2" into waste connection and rotate J-bend for proper alignment and fit onto wall bend tube. If necessary, trim wall bend tube length.
- Remove wall bend tube from waste connection and slide on the bell flange and waste slip nut.
- Re-insert wall bend tube into waste connection.
- Insert rubber washer on wall bend & secure wall bend slip nut to J-bend.
- Secure waste slip nut to wall bend.
- Slide bell flange flush to wall.
- Secure slip nut to tailpiece.
- Turn on water supply. If leaks appear, check alignment and carefully retighten.

Hand tightening all the slide nuts should provide a good seal to joints

Contents: (1) 1-1/4" J-bend, (1) 1-1/4" Wall bend, (2) 1-1/4" Slip nuts, (2) 1-1/4" Rubber washers, (1) Bell flange.

Tools required: Hacksaw, measuring tape

Care and Cleaning

The lustrous finish on your Restoration Hardware Bathware fixture should be treated with care. Improper handling or cleaning can damage the surface of any metal finish. Use a soft cloth to wipe clean. Avoid harsh abrasive cleaner. Water contains lime and other mineral deposits that will be left on the surface after the water has evaporated. You can prevent these deposits from forming by always wiping the fixture dry immediately after use.

Technical Support and Customer Service

For technical support in the installation of your Restoration Hardware Bathware fixture, please call 1-866-417-5207 weekdays between the hours of 7:00am and 4:00pm PST.

For other questions regarding your order, to order additional components of the Restoration Hardware Bathware Collection, to order replacement parts, or to address warranty issues, please contact Restoration Hardware Customer Service at 1-877-747-4671.
