

RESTORATION HARDWARE

Botanical Name: hедера helix

Light: Bright, indirect

Inside Temp: 40 - 80°F

Min OutsideTemp: -10°F

Care: Let soil approach dryness between watering. Do not let roots stand in water.

Ivy, a native of Europe, has been cultivated by man for thousands of years. Today, Ivy is valued for its versatility and resilience in adverse conditions. The contemporary approach to creating Ivy Topiary on wire frames is based on the ancient art of Topiary, which has been used for millennia to decorate homes, palaces, patios and magnificent gardens.

This Ivy Topiary was produced using one of the best varieties of Ivy, specifically selected for its beauty and longevity. It was grown slowly and then carefully hand-wrapped to produce the highest quality Ivy Topiary available.
