

Assembly Instructions For Charging Tray

Our charging trays should only be used with 2012 and newer Apple® brand 30 pin to USB and Lightning to USB connector cables. Please follow these instructions for safe and accurate fit and function.

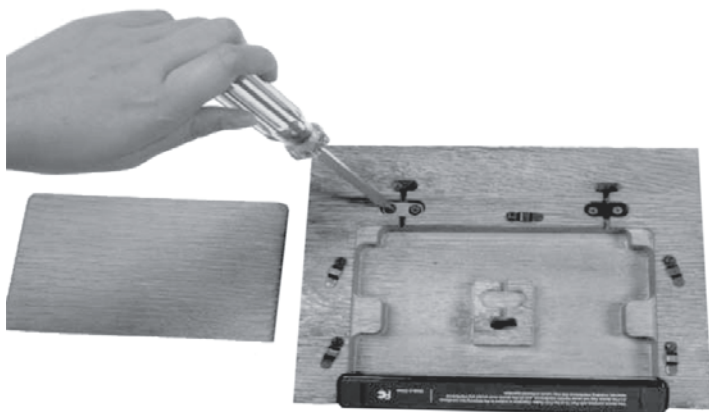

Step 1: Place the Charging Tray face down.

Step 2: Rotate the metal clips to unlock the back panel and remove the back panel.

Step 3: Unscrew the small metal plates and set aside.

Step 4: (For iPhone® 4) Thread the USB end of your 30 pin connector cable through the slot starting at the top of the charging tray and pulling through the bottom. (Fig. 1)
Pull into place so that there is no movement. (Fig. 2)

Step 5: (For iPhone® 5)
(Continued on other side.)

RESTORATION HARDWARE

Step 5: (For iPhone® 5)

Before threading your lightning connector cable into place, affix the provided metal lightning adaptor (Fig. 1) to the base of your lightning tip. When placed in the tray, your charging cord for the iPhone® slot should be exposed within the metal clip facing the back of the charging tray (Fig. 2). Your charging cord for the iPad® slot should be exposed within the metal clip facing the front of the charging tray. IMPORTANT: Pull and secure your cords into place so that there is no movement.

Step 6: Using a Phillips screwdriver, replace the small metal plates. To avoid crushing the cord, before tightening, make sure the small groove in the metal plate sits over your connector cord. (Fig. 1)

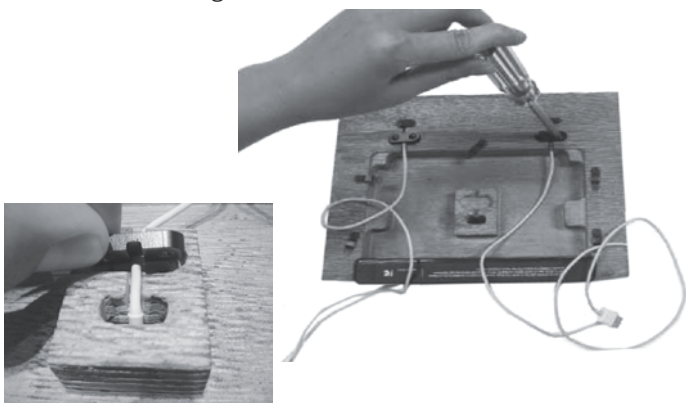

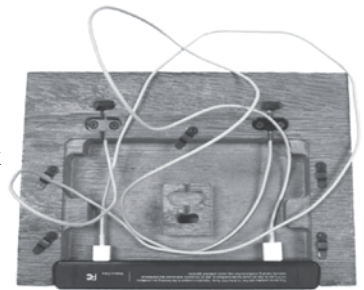

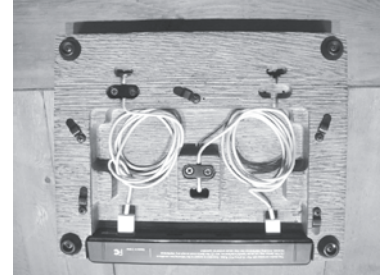

Fig. 1

Step 7: Carefully connect USB end to the charging tube.

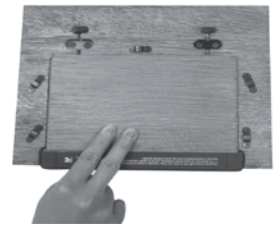

CAUTION: To avoid fit issues and breakage, be sure to check the USB cord is in the correct direction with USB symbol facing up. DO NOT FORCE.

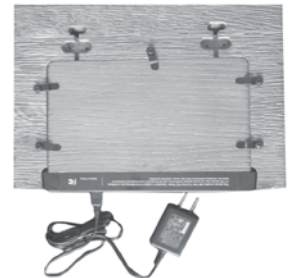

Step 8: Arrange and wrap the cords within the cavity of the charging tray.

Step 9: Replace the back panel and use the clips to secure it into place.

Step 10: Connect the power adaptor to the charging tube. Turn power switch to on position.

Step 11: If charging an iPad, using the screw provided, install the adjustable L bracket into place to hold the iPad securely. (The L bracket can be adjusted for different generations of iPad.)

Step 12: Plug the adaptor into an electrical outlet and enjoy.
