1. Install the Threaded Nipple (B) with hickey and nut into the ceiling box. You must provide a 1/4 IPS threaded nipple pipe (not provided) which will go through the top of ceiling box and through a structural member of building.
2. Attach Ceiling Loop (C) to the Threaded Nipple (B).
3. Put Canopy (D) to Ceiling Loop (C), and secure with Lock Collar (E).
4. Using the dimensions of the fixture as a guide, shorten the Chain (G) as needed using a pair of chain pliers.

ASSEMBLY & INSTALLATION CONT.

5. Unscrew the threaded collar on the Carabiner (F). Attach the chain to the Ceiling Loop (C). Close the threaded collar to secure the chain.
6. Unscrew the threaded collar on the other Carabiner (F). Raise fixture body and attach Carabiner (F) to the Top Ring (H). Close the threaded collar to secure the fixture body.
7. Unwrap the wiring from the top of the fixture body. Weave the power supply cord and the ground wire through the Chain (G).
8. When you reach the canopy and ceiling loop, measure the wires and cut. Be certain to leave enough to connect inside the canopy.
9. Twist the power supply and ground wires together and push through the center. Loosen the Lock Collar (E) and let the Canopy (D) slip down the chain carefully.
10. Join fixture safety cable with safety cable from ceiling.
11. Wrap both safety cable around the cable lock nut.
12. Insert screws into both holes on cable lock nut and secure screws with screwdriver.
13. Push the cable lock nut into the ceiling box.
14. Connect the Ground (bare) fixture wire with the ground (usually bare) wire from the ceiling box using Wire Nut (A). If the house does not have ground wire, then attach this wire to the green grounding screw inside of outlet box.
15. Connect the neutral (ribbed edge, no markings, or WHITE) fixture wire with the neutral (usually white) wire from the ceiling box using Wire Nut (A).
