

CHARACTERISTICS OF OUTDOOR CUSHIONS AND UPHOLSTERED FURNITURE

- Our lofty, zippered and poly-filled cushions come in a choice of luxury performance Perennials® or Sunbrella® fabrics. Both Perennials and Sunbrella performance fabrics are 100% solution-dyed acrylic, which means the fibers are completely permeated with color to best withstand the elements. Both fabrics are easy-care and weather-friendly, resisting mildew, stains and fading.
- Note that some Perennials fabrics have a soft hand with a thicker pile. Over time these fabrics may develop a brushed, softened appearance as a result of use and wear. This is a natural characteristic; if desired, loose fibers may be removed with a fabric shaver.
- Although our upholstery is mildew resistant, spores that create mold and mildew thrive in environments with dirt and moisture. To deter mold and mildew, always remove wet cushions from furniture frames and perform monthly cleaning and maintenance.

ROUTINE CARE AND MAINTENANCE

- Use a dry, soft-bristle brush to dust fabric weekly and remove dirt before it becomes embedded.
- For spot cleaning, use a mild cleaner, such as Simple Green® or OxiClean™, with warm water and a soft-bristle brush. Rinse thoroughly. Flip cushions on their sides with the zipper facing down and unzipped to ensure that all water drains.
- For a more thorough cleaning, a power washing with a pressure of 1200-1400 PSI is highly effective – anything more will damage the fibers. Hold the power washer approximately 30" away from the pillow to wash away mold and mildew. Repeat as necessary to achieve desired results. Flip cushions on their sides with the zipper facing down and unzipped to ensure that all water drains.
- Avoid letting water stand on the surface of your furniture and cushions.
- When cushions are not in use for an extended period of time, they should be removed and stored in a dry place if possible.

CARING FOR CUSHIONS IN THE RAIN

- RH collections with standard cushions are constructed with a repellent to protect the foam core. For standard cushions left in heavy rain, simply unzip and stand on end with zipper facing down to help water drain. Allow to air-dry.
- RH collections with reticulated, or “quick-dry,” cushions have an open cell structure for water to easily pass through and an open mesh bottom for water to drain.
