## CONCRETE & TEAK DINING & OCCASIONAL COLLECTION

FRENCH BEAM, BELGIAN TRESTLE AND ENGLISH TRESTLE STYLES

### FEATURES

Vintage design interpreted in premium teak and stout enough to support the industrial style of a thick concrete tabletop. Already handsome partners, both materials will acquire a soft patina with age and use.

- Tabletop is handcrafted from 3" thick concrete composite in deep slate grey
- Aluminum banding has a black powdercoated finish
- Substantial teak base provides enduring strength and features a weathered grey finish that will acquire a soft, aged patina over time
- Inherent variations in the color and shading of the concrete, as well as the casting process, lend unique character to each table; no two will be exactly alike
- Concrete may exhibit spotting and hairline cracks due to exposure to the elements; scratches may appear due to usage
- Teak base withstands sun, rain, frost and snow

### CARE

Concrete may exhibit spots and hairline cracks due to exposure to the elements and usage. The teak bases have a weathered grey finish that will fade over time. It is important to reseat the finish of the concrete top at the end of each season. This is recommended on any outdoor concrete furniture with a finish or stain.

### Concrete

*Concrete & Teak Tables (tabletops)* - Clean with a damp cloth. Avoid abrasive soaps and cleaners. Wipe up spills quickly to avoid staining. Do not cut directly on the concrete tabletops. When not in use, a custom-fit cover must be used to guard against moisture and the elements. This will protect the finish and prolong the life of your furniture.

To remove scuff marks and slight scratches from concrete tabletops, clean with Holloway House® Lemon Oil. Place a small amount of the lemon oil onto a clean cotton cloth and wipe down entire surface of concrete until the oil is evenly applied and marks disappear. Use another clean cotton cloth to wipe up excess oil until surface is dry to the touch.

Concrete tabletops are sealed with a clear, water-based acrylic coating. Resealing becomes necessary when highs and lows in the sheen of your table top become visible. Depending on amount of use and exposure to the elements, resealing may need to be completed at the end of each season, or as needed.

### Teak

*Teak with a Weathered Grey Finish* - To keep clean and mold-free, and prolong its soft, weathered finish, protect your furniture with our custom-fit covers when not in use. If left uncovered, the weathered grey finish will fade away after a season of use. Once the weathered finish fades, exposing unfinished teak to the elements, the furniture will begin to acquire the beautiful silvery-grey patina that is typical of untreated teak.
