

CHARACTERISTICS

All-Weather Wicker and our other performance weaves combine the classic look of woven materials with the highest-quality man-made fibers for superb durability. Artisans weave the fibers by hand around fully welded, powdercoated aluminum frames, resulting in lightweight and corrosion-resistant furniture.

HDPE (High Density Polyethylene) fibers are resistant to mildew, fading, sagging, staining and cracking. Performance also depends on exposure and care.

CARE & MAINTENANCE

Spot cleaning:

- Brush off any dirt or debris with a soft-bristle brush or spray off with a hose.
- Dry with a soft cloth.

Thorough cleaning:

- Mix warm water with a mild soap, such as Dawn® or Method®, and clean with a soft-bristle brush.
- Do not use abrasive cleansers.
- Rinse with water and dry with a soft cloth.
- Power washing with a pressure of 1200 PSI is also effective. Hold the power washer approximately 30" away from the furniture.

RECOMMENDATIONS

- Furniture should be cleaned periodically and always before storing.
- If furniture is in a saltwater environment, rinse weekly to remove all salt.
- Avoid letting water stand on the surface of furniture and cushions.
- As with all RH Outdoor purchases, we recommend using our custom furniture covers for items when not in use; furniture cushions and covers should be clean and dry before covering.
- Cushions should be removed - whenever possible - before covering the frames for longer than a few days to avoid mold and mildew build-up.
- If cushions get wet, tip them on their sides with the zipper facing down and unzipped to ensure that all water drains.
